About the project

Our project aims at making pupils realise the impact human beings can have on the environment. They will discuss global environmental issues, explain why they have to be sorted out and justify their points of view. We will then reduce the scope to local issues and pupils will create a quiz and group presentations on the environmental problems in their towns. After that, they will be put in groups of six (two from each of the three participating schools) in order to create a campaign on daily gestures to reduce our negative impact on the environment. Pupils and teachers will vote for the best presentations and compile all the works in a common book on Twinspace.

AIMS

We hope that throughout this project, the pupils will get a better understanding of environmental issues (what causes them and how to attempt to solve them). They will be working in groups, which will make them use collaborative skills : they will have to communicate, listen to each other and be respectful with each other despite their potential differences of opinions. They will develop their ability to write, read listen to and speak English, as groups but also with other teenagers from different countries they will learn to work with. They will consequently open their horizons and reflect on other pupils' ideas. In order to give their opinions, they will use their critical thinking and ensure they remain positive when judging each other's work. They will also have to be organised and work in a given time with deadlines. For the campaign they will invent, they will use their creative skills.

WORK PROCESS

Weekly frequency; pupils will interact on apps in groups of 2 from each school.

1: Create a Twinboard : pupils introduce themselves and write what is the worst environmental problem according to them and why ; they are in groups of 2 (by 6/02)

2: Watch a video with the worst problems and vote for the worst with "Create a thread" ; debate on "Tricider" (by 13/02)

3: pupils create a quiz: "How green is your town ?" about local environment problems from their town on Google forms (by 5/03)

4: pupils put together the problems from their towns and create a powerpoint with photos and explain the issues. Pupils from other schools give their opinion and suggest solutions about daily gestures (by 12/03)

5: pupils put together all the problems/solutions in their international groups ; create a common project in groups of 6 to promote a campaign to raise people's awareness about environmental issues (app to be defined) (by 19/03)

6: Vote for the best campaigns (categories) (by 26/03)

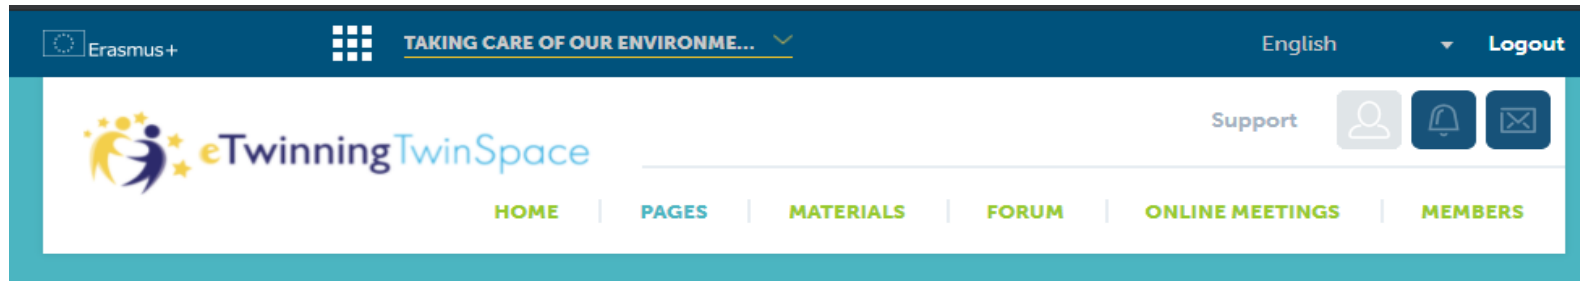

EXPECTED RESULTS

We will collect all the presentations and create a common book (potentially thanks to the software ISSUU) which we will publish on the Twinspace as a conclusion to the project.

Step 3 : Environmental problems where I live (Italy)

Final step : a leaflet about saving the environment

Step one : getting to know each other

1) We introduce ourselves 2) What is the worst environmental problem according to us ? Why ?

Miss Levasseur

Hello :) My name is Miss Levasseur, I teach English in Schweitzer highschool in Mulhouse, France. I like reading, being with my friends, watching movies and most of all: traveling !
According to me, the worst environmental problem is pollution, especially water pollution because it

Lila

Howdy! My name is French and I from in Lila..... understand? XD I live in Mulhouse, obviously I have the same age than you, I love chesse, it's my passion, and cartoon like adventure time, steven universe, my little pony etc.... I drawing cute and funny draw I love anime, my favorite is my hero academia and my idol in is Present mic!
I have 4 best friends (is my gang XD) It's called LOCK MAMARI

Alessia Medicina

The biggest pollution in my opinion is the car . Pollution can be reduced by using electrical car, which don't emit dangerous substances.the electric car is easier to use , you can use it in underground parking and finally it is cheaper.but there are also some downsides in electric cars: the battery and the carbon emission

Lorenzo Gerace

I think that the worst

sea...

R.S.Tiffany

Hey (◡‿◡)◊. My name is Rajaonarivony S.Tiffany and i'm a student in Schweitzer highschool. I live in Mulhouse and it's my second years here. Now i'm 16 years old but my face don't show this...

I'm a lucky girl, I look so young

(◡‿◡)

I like play piano, draw manga, listening asian pop and watch BL (don't search what it is.) It's a joke of course!!

According to me, the worst environmental problems is certainly the Factory, because they produce a lot of wasts, threw it on the sea, and make the global warming. they pollut the environment, uproot the nature to creat their commodity, and don't care a about our/their futur. Their acts prive us of many stuffs and collapse a lot of things. they aren't the only cause of the environmental problems but they are ..

Elena Cardone

For me the worst environmental problem is plastic in the seas, because I am very attached to the sea in general, and for me seeing all that plastic in the seas really makes me sad. I hope that we can fix this.

Eleonora Bosca

For me one of the worst pollution problem today is the waste fires, these fires create toxic substances that are bad for our health. I hope we will fix this problem all together, because I don't want people to feel bad and hurt

Aleandro Kertalli

For me one of the worst enviromental problem is the pollutions of the cars.Today cars produce a lot of smoke and the air is very polluted,the smog is increasing more and more.Fortunately many now use eletric cars.The less we pollute the better it is.

Matteo Poinelli

[Link](#)

atmosphere (the ozone layer), and a much larger springtime decrease in stratospheric ozone around Earth's polar regions. The latter phenomenon is referred to as the ozone hole. There are also springtime polar tropospheric ozone depletion events in addition to these stratospheric events.The ozone layer prevents most harmful UV wavelengths of ultraviolet light (UV light) from passing through the Earth's atmosphere. These wavelengths cause skin cancer, sunburn and cataracts, which were projected to increase dramatically as a result of thinning ozone, as well as harming plants and animals

riccardo cosentino

in my opinion one of the worst pollution problem is plastic in the oceans because the peoples throw bag of plastic, plastic bottles and the ships in the middle of the sea throw oil, petrol, and fish die for this problem and so all these life forms die

merilu kapiti

According to me the biggest environmental problem is the plastic in the sea. There is a huge quantity of this pollutant products in our seas and it looks like this issue is sometimes underrated but i think is a very important deal. The amount of plastic in the seas and in the oceans is frightening and we have to fix the mistakes that we've made because if we don't our future won't be brilliant.

miriam masio

In my opinion the worst environmental problem is the plastic in the oceans, because it creates damage to fish and to us that we eat fish, and so much waste is accumulating, killing animals and our planet

Greta Pignone

The biggest problem of the environment? Well I think is the closed mind of people. I can't stand people who say doing something is unproductive; everything will help the earth, will be useful (also the smallest actions)

due to too many vehicles consuming gas or carbon. I hope that this problems will be resolved as soon as possible but this is only possible if the human being really wants to save our beautiful planet!

Mahmoud

Hello my name is Mahmoud I am Syrian I'm a student from the high school Albert Schweitzer. I live in Mulhouse France and I am 16 years old. I have a big family we are 5 children's I like play PlayStation and I want to be an architect in the future. And I am funny. I think the biggest environmental problem is the pollution

Léa

Hi 🍌 I'm Léa I'm 16 years old and I study in Schweitzer highschool in Mulhouse (France) I like music, playing video games and watching anime. I also like to hang out with my friends. In my opinion, the worst environmental problem is the lot of waste everywhere. It's

I play piano and i sing. I like reading and writing stories, poems and lyrics of songs. I listen a lot of type of music like French songs, rock, pop and a little rap (little little). I love watching movies, I think I'm cinephile 😊. I like sport too. I take taekwondo lessons. It's a martial art where you use kicks.

For me, the most important environment issue is the question of pollution. It's very dangerous for our health. (Sorry I don't have time to write more about that)

Ojeda-Sendra Marie

Hi :) I'm Marie and I am 16 years old, I study at the Albert schweitzer lycee. I live in mulhouse and I'm spanish and i speak to :) I playing football, piano and I skate My worst problems for the environnement is the global warming due to global warming, some species will no longer have an environment and may even become extinct...

[Go to page](#)

[Pamela Levasseur](#) - 28.02.2020 @ 08:18

I am personally very shocked by this video, because it makes me realise that humans are not careful at all with our planet. I particularly hate that some people hurt animals so much, for their own pleasure ! :(We should create more laws and punishments for horrible people who hurt animals. What do you think ?

[Pamela Levasseur](#) - 28.02.2020 @ 08:20

in my opinion this video,it has a lot of meaning and makes you think a lot, because every day that passes, the world is usffering from it,

[Riccardo Cosentino](#) - 05.03.2020 @ 11:55

In my opinion this video was very significant. It made me think about how we are destroying the world with our hands. According to me we should reduce these things because they are seriously be having the world.

[Sofia Panarelli](#) - 05.03.2020 @ 11:56

this video can rappresent how the human destroys the planet.

this video can represent how the human destroys the planet.

we have to save our home.

We must try not become like the man in the video.

[Joshi Frumento](#) - 05.03.2020 @ 11:56

This video impressed me a lot because we can see everything we have and continue to cause in our planet, this video may teach us not to be like that man, we should not pollute the waters of our seas :)

[Elena Cardone](#) - 05.03.2020 @ 11:57

In my opinion this video is really moving because we can see how man is not interested in saving our beautiful planet, even the mistreatment of animals is a truly disgusting thing that in my opinion must be eliminated!

[Emanuela Modica](#) - 05.03.2020 @ 11:57

I think that we have always behaved (and we still behave) as if we were the owners of this planet. We are not, because we are not the only living being on that. If we respect nature we will live better with ourselves; it's a moral law.

[Alessandro Oliva](#) - 05.03.2020 @ 11:58

For me this video represents the things we don't have to do to pollute, we can see how the people destroys the planet

[Aleandro Kertalli](#) - 05.03.2020 @ 12:00

I am personally shocked about this video. I can't realize how we destroyed the world, how we treated animals. Some people kill animals to make jackets, others use their heads as furniture. I think we could commit ourselves not to use real animal skin, not go hunting to have fun but also think of others as well as us because all this will then come against us

Interactions between students :

In my opinion everything could be right within limits.

But humans don't understand what limits are, they want more and more and can't stop themselves because they're selfish and don't care about the others, they only think about their life, making money and fame!

As I've just told in the previous thought about environment problems, the biggest one is people's indifference, because it's easier to keep on doing the same instead of changing the wrong customs to help the Earth.

[Greta Pignone](#) - 05.03.2020 @ 12:25

In my opinion this video was very significant. It made me think about how we are destroying the world with our hands. According to me we should reduce these things because they are serious!

[Armand Klein](#) - 05.03.2020 @ 15:51

I agree with Iris, we should find a new solution to fight against human destruction. For the safety of our planet.

[Alexandra Knoerr](#) - 05.03.2020 @ 15:51

I agree with [Sofia panarelli](#) because Man always wants more and no longer respects nature, he destroys everything to get what he wants

[Anais Dziedzic](#) - 05.03.2020 @ 15:55

"Human is the worst"

In the world, humans have broken the earth...

[Camille Grussi](#) - 05.03.2020 @ 15:55

Project Anaïs and Tiffany

Shqipdona et Elizabete

Alexandra and Laura

Omnia and Camelia

Daniela Coelho de Sousa

From the group Elena Cardone, Eleonora Bosca, Sofia Panarelli

We answer to AIT OUAARAB Yasmine and BINICI Léa questions from their presentation. You could use many electric cars and bikes and you could walk, and for avoid waste in the floor you could add

alessia medicina

i'm answering to Omnia and Camelia: in my opinion is important to reduce the consumption of meat, especially beef. It is no mystery that the primary cause of deforestation is the conversion of the forest into cultivated fields to feed cattle. The same goes for all those crops that come from distant countries. But i know is difficult reduce meat consumption, I myself eat meat often

Camelia and Omnia to Alessia Medicina

PRESENTATION ENVIRONMENTAL PROBLEMS IN ITALY

By Elena Cardone, Eleonora Bosca, Sofia Panarelli

PRESENTATION ENVIRONMENTAL PROBLEMS IN ITALY

by Alessia Medicina and Sofia Gaggero

[Link](#)

ENVIROMENTAL PROBLEMS IN ITALY

By Biale Astrid, Firpo Iris and Vallino Marianna

[Link](#)

Environmental problems in Italy and solutions

The most common environmental problem in Italy is pollution (47%).

One of the causes of concern is the mafia, which deals with illegal waste disposal.

Others problems are -air pollution, which occurs more to the north.

- natural heritage
- contamination of natural waters
- hydrogeological instability

From the group Tiffany and Anais

we answer to Biale Astride, Firpo Iris and Vallino Marianna.

1) We can resolve it by put in front of the bins, panel or poster to show how to us correctly bins. Or give the instruction directly in evry house.

2) It can be financed by association who fight against the pollution or they can do little show (Humorous show) to gain money. Or we can just give them enough

Final step : collaborative leaflets about saving the environment (Italian + French students worked together as teams)

Pages

Final step : a leaflet about saving the environment

Collaborative leaflets made by Italian + French groups

Instructions :

You are an association trying to raise people's awareness about saving the environment. Create a minimum 120 words leaflet to convince people to act. Explain :

- Environmental issues
- Their consequences now and in the future
- What could happen if nothing is done
- Solutions : what could be done to save the planet

Interaction between students about the leaflets

Pages

Step one : getting to know each other

Hello from Savona

L Hello from Mulhouse :)

Step 2 : This is how we destroy everything

Step 3 : Environmental problems where I live (France)

Step 3 : Environmental problems where I live (Italy)

Final step : a leaflet about saving the environment

Let's discuss the leaflets !

Give 2 positive aspects + 1 suggestion for improvement about minimum 2 leaflets of your choice.

About Iris, Astrid, Marianna, Kawtar and Lila's presentation

Thank you for your presentation girls :) I really liked your choice of colours and the fact that your information is direct and detailed ! Maybe you could have some parts where you write full sentences ?
Miss Levasseur

About Emanuela, Sophie, Riccardo, Shqidonna and Elizabete

Your leaflets is simple but efficient. You don't write a lot but that's enough. I think you should had more examples of the issues so give more solutions and had more images but it's jsut my opinion and i don't know for the others. But in general, it's good.
created by Tiffany

About Léa, Yasmine, Alessia and Sofia's presentation

Thanks for your presentation girls :) I really liked the animations on your presentation, it was very pleasant to read it. Moreover, I enjoyed the fact that even if you wrote some full sentences, it was not "too much" and very interesting ! Maybe at the end of your presentation you could give personal examples of what you do yourselves at home to try and reduce pollution ?
Miss Levasseur

About Iris, Astrid, Marianna, Kawtar and Lila's presentation

I loved your presentation because it was neat and clear. May

About Elena, Eleonora, Sofia , Ysaline, Mathilde's presentation

Thanks for sharing your work girls...great work! I enjoyed looking at your presentation - the slides are not too wordy and you've chosen some good photos to illustrate your ideas. You could possibly add a final slide where you each say one thing you personally do or try to do.

Elene, Eleonora, Sofia, Ysaline, and Mathilde presentation

Thank you for you presentantion, I really liked because I totally agree with you, your ideas are clear and well explained. And the slides are very beautiful. Maybe for the next time you can put a little more idea in a slide.
Elizabete

that are going on and what we can/could do about it.
Elenas group I like the way you listed several issues and how we can improve the health of our home. I liked the pictures too. I could see what you guys were talking about.
Daniela Coelho de Sousa

About Tiffany, Greta, Anaïs, Merilu, Bao, Valeria, Habiba's presentation

I like your presentation, it's really interesting. The photos you have chosen are good. The texts are simple and effective. Maybe you could have put more solutions at the end. I just have a really negative point, maybe it's because I'm not using the same software as you, but it's really complicated to read certain sentences (the photos hide them) and the sentences that are too long are out of frame

About Elizabeth , Shipdona , Emanuela , Sophie , Ricardo.

Im agree with you because you say the

presentation because it was very beautiful and the texts very complete and detailed, they did a very good job. I don't say that just because they are my friends (a little anyway) but it was very very good. Léa don't thank me :)

my comment about Lila, Kawtar, Iris, Astrid and Marianna's presentation

I think your work is very good, the slide is well made, and the content is very complet. The only bad point is that the 3 first slide aren't complet visually, it empty of "colour". That's all, all the rest is good.

About Tiffany's group presentation

Your presentation was really convincing and detailed. It showed us step by step the issues, their origins, and how they should be resolved. The pictures were great too because they totally illustrated your words. However (I don't know if I'm the only one who has this problem), there are some slides that I couldn't read because of the pictures and it's

only bad point is that on the three first slides, it's not enough complet visually. That's all, watch JoJo

The issues

The groups of tiffany we do a good job, all of presentation have the same interface and it look professional . the images used are cool but the 7nd is too much in my opinion and i like tiffany's jokes XD

lila 🏠

About Mathilde's group presentation

I really liked your presentation because it was totally like a leaflet : It's smooth, clear, neat, and it gets straight to the point. The pictures are nice and accompany perfectly the text. I think it doesn't need any improvement, it's great :)
Léa
